BEINCOURT FLEX is a preconfigured mobile audio and video courtroom/civic solution that is easy to set up and teardown. The solution arrives to the customer pre-configured and self-contained in a hardened mobile package.

The solution arrives to the customer pre-configured and self-contained in a hardened mobile package. BEINCOURT Flex provides audio and video conferencing integration for non-fixed installation rooms. The system is pilot deployable within minutes by two people with no expertise in audiovisual systems. BEINCOURT FLEX supports simultaneous interpretation allowing all parties to hear the same language irrespective of their location.

BEINCOURT
Serving justice. Virtually.
